- **Brief Description**

It is a Hotel Management Website named “Bluestar” where we provide some facility to both user and admin.

In bluestar user can login ,logout and make registration, book rooms ,check his booking availability, manage their booking(where he/she modify and cancel his/her booking), give his/her rating and reviews to the hotel, manage his/her profile (update or delete) and make payment by various modes of payment.

And admin can also login and logout, manage rooms(update or delete), manage user (update or delete or ban), manage booking(update or cancel), manage rooms, manage refund on cancellation , generate invoice and shutdown the website.
